

ProFill

Sports Turf Infill Sand

Our ProFill sports turf infill sand is high purity silica quartz, and processed to ensure uniformity in grain size. All sands are washed, dried and screened. Infill sand is an integral part of the synthetic turf, our sands have been used on professional, collegic and high school fields. We also offer gravels that have been specified for the cushion layer below the turf. All products are tested daily for quality and consistency. Logistic service always available.

- ProFill 10: Coarse grade, average grain size of 1.0mm
